

Key features of Masters Programs

Dr Peter Barrington
Head of Department of Aerospace and Aircraft Engineering

Holders will be able to:

- deal with complex issues both systematically and creatively
- make sound judgements in the absence of complete data
- communicate their conclusions clearly to specialist and non-specialist audiences.

Holders will be able to:

- demonstrate self-direction and originality in tackling and solving problems
- act autonomously in planning and implementing tasks at a professional or equivalent level

Holders will be able to:

- continue to advance their knowledge and understanding, and to develop new skills to a high level.

Holders will have the qualities and transferable skills necessary for employment requiring:

- the exercise of initiative and personal responsibility
- decision-making in complex and unpredictable situations
- the independent learning ability required for continuing professional development.

Key Features

Much of the study undertaken for master's degrees is at, or informed by, the forefront of an academic or professional discipline.

Key Features

- Successful students show originality in the application of knowledge
- They understand how the boundaries of knowledge are advanced through research.
